# Kardex VCM Box

# Kardex VCM Box Base

The base box is the most important component, as all other frames and dividers are based on this box.

The Kardex VCM Box, tailor-made for the Vertical Carousel Module (VCM), ensures a flexible, customized, and organized storage solution. It is available either with a width of 200 mm or 400 mm, each with a depth of 425 mm, 525 mm or 625 mm. The base box can be adjusted with different frames and dividers to create individual storage locations for various items. Fixed label holders are already integrated in the front area.

With an ergonomically shaped handle and a slight elevation in the longitudinal direction at the bottom of the box, the Kardex VCM Box can quickly and comfortably pull out of the carrier and push back in smoothly. The two bars in the front area of the box are specifically there to utilize the full depth of the carrier. The bars prevent the box from slipping over the carrier. Thanks to a slight incline in the lower area of these bars, it is also possible to pull the box ergonomically and without great effort also easy over the front lip of the carrier.

## Unique frame system

The Kardex VCM Box is recognized by its frame concept. The Kardex unique and smart EasyClick system allows the possibility to build up the Kardex VCM Box base to different heights. It always adapts to maximize the Kardex VCM Box volume. The Kardex VCM Box is extremely flexible and will adapt to your future needs. It is possible to change its height by adding or reducing frames.

**Flexible**  
and scalable  
box system

Optimally  
adapts to  
**customer's  
needs**

**Effective**  
use of available  
storage space

# Flexible divider system

Kardex VCM Boxes flexibly divide and quickly adapt at any time by using cross and longitudinal dividers.

The individual divider concept creates different combinations in order to reach the desired height.

This creates individual storage locations and enhances flexibility as well as scalability of the box to deliver a complete storage and classification system. This further ensures maximum storage volume and high-density storage.

Smart plug-in with EasyClick system

Highly-flexible height, width, and depth

Environmentally friendly

	275 mm (1 divider 145 mm + 2 divider 65 mm)	
Material	Polypropylen (PP)	
Colour	Blue	
Payload	Up to 35 kg	

### 1 Base Box

The basic box is the most important unit in the Kardex VCM Box concept, as all other frames and dividers are based on this box.

### 2 Frames

With an EasyClick system, the frames can be placed on the base box and plugged into each other to be able to adjust the height of the box quickly and flexibly.

### 3 Divider

This concept further increases the flexibility of the box in order to provide a comprehensive storage and classification system for the Vertical Carousel Module.
