# Kardex VBM Box 

kardex remstar

## Kardex VBM Box Base

The base is the most important component, as all other frames and dividers are based up on it.

The Kardex VBM Box, tailor-made for the Vertical Buffer Module (VBM), ensures a flexible, customized, and organized storage solution. It is available with a depth of 640 mm , and with a width of 440 mm . The Kardex VBM Box base can be adjusted in height by adding our unique 50 mm extension frames. You can adjust the Kardex Box base height from 138 mm to 188, 238, 288, 338, 388 mm and, with the dividers, create individual storage locations for various items.

It is possible to add label holders with a maximum label size of $90 \times 25 \mathrm{~mm}$. It is possible to place an ID sticker with a maximum size of $195 \times 50 \mathrm{~mm}$ on both short sides of the base. The Kardex VBM Box also offers optional drainage holes (allowed for sprinkler systems). The silent Box with double base is also approved for conveyor technology.

## Unique frame system

The Kardex VBM Box is recognized by its frame concept. The unique and innovative Kardex EasyClick system allows for building Kardex EasyClick system allows for burt heights and continuously adapts to maximize the box volume.

The Kardex VBM Box is a highly flexible option that will adapt to your future needs since it is possible to change its height by adding or reducing frames.

Flexible
and scalable box system

Optimally adapts to the customer's needs

## Effective

 use of available storage space
## Flexible divider system

The Kardex VBM Boxes dividing system is flexible and can quickly adapt at any time by using cross and longitudinal dividers to change the locations sizes. The individual divider concept creates different combinations in order to reach the desired height.

This creates individual storage locations and enhances flexibility as well as scalablitty of the box to deliver a complete storage and classification system. This further ensures maximum storage volume and high-density storage

## 1 Base

The base is the most important unit in the Kardex VBM Box concept, as all other frames and dividers are based up on it.

## 2 Frame

With an EasyClick system, the frames can be placed on the base and plugged into each other to adjust the height of the box quickly and flexibly.

## 3 Divider

This concept further increases the flexibility of the box to provide a comprehensive storage and classification system for the VBM.
